

## Neutra Modular Storage System

Designed by the Spanish duo Arnau Reyna, Neutra is a flexible, minimalist shelving solution named after Richard Neutra's functional architecture. This new addition to the SS22 Collection by Bolia highlights the objects it carries while blending in with the setting thanks to its sleek design.

Office, bookcase, storage space or simple shelf: the Neutra system is infinitely modular. This flexible, refined and durable shelving system is inspired by the light modernism of architect Richard Neutra. Designed in robust, modular combinations, Neutra allows the user to create a piece of furniture that precisely meets its wishes and needs while fitting perfectly into the interior.

The Neutra storage system blends into a private or professional setting with elegance, letting the displayed items take center stage. Beautiful books, vases, works of art or precious objects are thus emphasized, while Neutra fades away thanks to its minimalist lines of great finesse.

Neutra is available in a range of modules, sizes and materials to bring a personalised touch to any space. Its boards are made of white pigmented oak or grey lacquered MDF. Its support is available in black or grey lacquered steel, the harmony of wood and metal bringing to its expression a particular effect of contrasts.

The warmth of the wood and the finesse of the lines are the invitation of nature that distinguishes the new Bolia spring collection. The design universe is light, sensual, and clearly refers to Scandinavian nature and its spring season synonymous with blossoming. Neutra creates a calm and optimistic atmosphere with its durable and environmentally friendly materials and soft colours reflecting the changing seasons.
